

GAMMA Himalayan Saltware™

**Chefs in many renowned Restaurants are discovering
a unique way to cure, cook and serve
Seafood, Meats, cheese & Vegetables**

Himalayan salt is the world's most natural, mineral rich, pure and pollutant free salt on our planet. It contains no mercury. The consumption and cooking products contain 1/3 less sodium than common table salt, which makes it "heart healthy". Millions of years ago, the primal ocean was naturally dried up with solar energy. With the intense pressure and temperatures of the Himalayans, the salt became crystallized. The lamps and candle holders naturally release negative ions creating a tranquil atmosphere, are therapeutic and reduce indoor pollutants.

**Salt Block 5/7.5x2 Inches
Round on Wood Base
